AS Galvanised Thimbles

IOur AS Galvanised Thimble – a robust solution designed to reinforce the eyes of wire rope and fiber rope assemblies. Crafted from heat-treated high tensile steel, this thimble is engineered for durability and strength, ensuring reliable performance in lifting applications. The hot-dip galvanized finish not only enhances its corrosion resistance but also adds an extra layer of protection against wear and damage.

Ideal for reducing wear and damage to the rope caused by attachments, the AS Galvanised Thimble is a crucial component for maintaining the integrity of your lifting setups. Complying with AS1138 standards, this thimble meets stringent quality and safety requirements, making it a trusted choice for various lifting applications where durability and performance are paramount. Elevate your lifting systems with the strength and reliability of the AS Galvanised Thimble.

Features:

- Used to reinforce the eyes or wire rope and fibre rope assemblies
- Helps reduce damage and wear to the rope from attachments
- Manufactured from heat treated high tensile steel
- Hot dip galvanised finish
- Suitable for lifting applications
- Complies with AS1138
